

## Conference Committees

|   |        |
|---|--------|
| Introduction  | p. 3   |
| Generalized pipeline for preview and rendering of synthetic holograms   | p. 6   |
| 3D TV by eye-lens-type electro-holography   | p. 14  |
| Occlusion processing and smooth surface shading for fully computed synthetic holography   | p. 19  |
| Lightforest: the holographic rainforest   | p. 31  |
| New approach to the real-time 3D display using a holographic optical element  | p. 36  |
| Three-dimensional image projection with aspects-focused-spots display   | p. 45  |
| Tangible holography: adding synthetic touch to 3D display   | p. 53  |
| Color silver halide hologram production and mastering   | p. 61  |
| Multiple illuminations method for rainbow hologram using an LCD projector   | p. 70  |
| Optics for full-parallax holographic stereograms  | p. 78  |
| New approach to the sampling of holographic stereograms   | p. 89  |
| Optimum sampling parameters for generalized holographic stereograms   | p. 96  |
| Fast computer graphics rendering for full-parallax spatial displays   | p. 105 |
| Holographic investigation on average Nusselt number over an isothermal rotating sphere  | p. 114 |
| Holographic interferometry for detection of breast lesions  | p. 121 |
| Holographic three-dimensional imaging system based on the modified triangular interferometer  | p. 131 |
| Method of making a holographic screen using a retroreflex plate   | p. 139 |
| Holographic transmission-type screens for projection of stereoscopic or multiview color images  | p. 146 |
| Recordable depth of view and allowable farthest far-field distance of in-line far-field holography for micro-object analysis                        | p. 156 |
| High-efficiency liquid-crystal-filled diffraction gratings  | p. 165 |
| Use of real-time latent images to write long holographic diffraction gratings in photoresist  | p. 182 |
| Method for making balanced multiple exposures in single-layer holograms   | p. 194 |
| Pulse hologram recording in DuPont's photopolymer films   | p. 200 |
| IDT-SEM observation of fringe pattern in volume hologram and its application to multicolor recorded HOEs  | p. 204 |
| Color saturation issues in modern holography  | p. 216 |
| Experimental study of color control on reflection holography  | p. 224 |
| DuPont multicolor holographic recording films   | p. 231 |
| Thick-layered gelatin for volume hologram recording   | p. 244 |
| Dichromated polyvinyl alcohol (DC-PVA), wet processed for high index modulation   | p. 248 |
| Effects of process control and exposure energy upon the inner structure and the optical properties of volume holograms in dichromated gelatin films | p. 255 |
| Review of the technology for the manufacturing of large-format DCG holograms for technical applications   | p. 267 |
| Intensive Bragg harmonics in reflection holograms in dichromated gelatin: I   | p. 279 |
| Intensive Bragg harmonics in reflection holograms in dichromated gelatin: II  | p. 285 |

|   |        |
|---|--------|
| Investigation on environmental stability of DCG holograms by molecule enclosure                                 | p. 293 |
| Review of recording media for holography at 10.6 [ $\mu$ ]m   | p. 298 |
| Holographic recording media: modern trends  | p. 306 |
| Erasable holographic storage in azobenzene polyesters and peptides  | p. 319 |
| New analysis of reversal bleach mechanism and catalytic reaction of exposure quantity in silver halide material | p. 327 |
| Wavelength-multiplexed holograms by persistent spectral hole burning  | p. 333 |
| Recording of real-time gratings at infrared in reaction centers' contained medium                               | p. 343 |
| Real-time holographic camera system   | p. 348 |
| Lippman photographs recorded in DuPont color photopolymer material  | p. 358 |
| Addendum  | p. 367 |
| Author Index  | p. 369 |
